BVLGARI

# Polychroma

Throughout its creative saga, Bvlgari has revolutionized the codes of high jewelry by introducing an entirely new approach to color. Now the Maison continues this daring tradition, designing creations that explore both the depths of single hues and the reflections between multiple tones.

Each Bvlgari gem thus possesses such chromatic density that it seems to throb with inner life, inviting the viewer to explore depths that appear infinite, and creating an experience that goes beyond the visual to become almost tactile.
